```c
#include<stdio.h>

int main ()
{

    int areaCode, exchangeCode, userNumber;

    long long int phoneNuumber;

    printf("Enter Phone Number\n");
    scanf("%lld", &phoneNuumber);

    userNumber   = phoneNuumber % 10000;
    areaCode     = phoneNuumber / 10000000;
    exchangeCode = (phoneNuumber / 10000) % 1000;

    printf("Area Code is : %d  \n", areaCode);
    printf("Exchange Code is : %d \n", exchangeCode);
    printf("User Number is : %d \n", userNumber);

    return 0;

}
```
